

Fibre Internet Connectivity for the village: One of our Councillors has been looking into the delivery of fibre internet connections to homes in Wymeswold and found that currently there is no rollout proposed by BT Openreach or City Fibre in the near to medium future. He has been in dialogue with BT Openreach about this situation and is looking at the possibility of co-funded delivery of fibre broadband. He has offered to collate details of any interested parties in the village to take back to BT for a potential cost estimate to deliver fibre to Wymeswold.

Please could all interested Wymeswold parishioners contact Councillor Nottingham via wymeswoldvillagefibre@gmail.com to register their interest.
